The Robert J. Bernard Biological Field Station

is an academic resource of the Claremont Colleges. This area consists of 86 acres of Coastal Sage Scrub, Riversidian Alluvial Fan Sage Scrub, Riparian Oak Forest, Grasslands, and an artificial lake. These diverse habitats have attracted over 100 bird species that are observed on a regular basis.

Status:

r = resident (present all year, presumably breed at BFS or nearby)
 s = summer visitor
 w = winter visitor
 m = migrant
 x = exotic
 v = vagrant, outside normal range

Seasons:

W = Dec-Feb
 Sp = Mar-May
 Su = Jun-Aug
 F = Sep-Nov

Abundance:

C = common, seen on >70% of visits
 U = uncommon, seen on 30-70% of visits
 O = occasional, seen on 10-30% of visits
 R = rare, seen on <10% of visits
